

Shanghai Metals Market Price Assessment Methodology

SMM 304/2B Stainless Steel Coil spot price

Product: SMM stainless steel (304/2B) spot prices

Last consultation date: August 9, 2019

Expiry date: October 28, 2020

Date last updated: October 28, 2019

Catalogue

1. Guidelines to SMM price assessment methodology

2. Guidelines to SMM 304/2B Stainless Steel Coil spot price assessment

2.1 Definition

2.2 Introduction of price assessment

2.3 Source of raw price data

2.3.1 Collecting from price data submitters

2.3.1.1 Criteria for price data submitters

2.3.1.1.1 Criteria for manufacturers

2.3.1.1.2 Criteria for traders

2.3.1.1.3 Criteria for downstream users

2.3.1.2 Formation and adjustment of the price submitter list

2.3.1.3 Process of price data collection

2.3.2 Collecting price data from other submitters

2.4 Detailed formation process and related regulations

2.4.1 Data collection

2.4.2 Data normalisation

2.4.3 Information data analysis, verification and screening

2.4.4 Evaluation of published prices (calculation)

2.4.5 Special circumstances

2.4.6 Price publication

2.4.7 Modification of published prices

2.5 Review of key points

2.5.1 Product specification

2.5.2 Major Stainless steel enterprises

2.5.3 Reference volume

2.5.4 Delivery

2.5.5 Payment terms

2.5.6 Delivery site

2.5.7 Unit

2.5.8 Form

2.5.9 Publication time

2.6 Price assessment process

2.7 Adjustment to the price assessment methodology

3. Historical data

4. Compliance with SMM Policies

1. Guidelines to SMM price assessment methodology

Shanghai Metals Market ("SMM") is an independent service provider that does not participate in trades. SMM is a market observer that engages buyers and sellers in the commodities market. By consulting with industry independent participants, SMM drafts the methodology, examines and revises it regularly based on the specifications and terms of trade that are generally used in the market, with equal weighting given to transactions that meet the standards. SMM reserves the right to exclude any unreliable or unrepresentative price data from its price assessment, in line with this methodology and other related Benchmark governance policies and procedures. SMM believes the processes and procedures documented in their Methodologies represent the most accurate way of representing the underlying economic reality of the markets each Benchmark seeks to measure.

SMM price assessments refer to metals spot prices or price indices of both the Chinese and overseas markets reported by SMM on a daily basis. All SMM prices are published according to a set of defined methodologies, indicating how the prices are accessed and reported. These methodologies are published on our website www.metal.com (English) or www.smm.cn (Chinese) or for all market participants to understand and refer to.

To reflect the actual trades in the spot market, SMM will update the methodology for SMM price assessments and publish all the revisions on our website www.metal.com (English) or www.smm.cn (Chinese) 28 days ahead of the changes. For queries or suggestions on the methodology, please contact SMM customer services (please find contact information on the SMM official websites). **Please read this paragraph in conjunction with the SMM methodology review and changes policy, and the SMM Complaint Policy available at www.metal.com (English) or www.smm.cn (Chinese).**

This document specifies the standards and management methods for the SMM 304/2B Stainless Steel Coil spot price assessment. These standards are formulated to establish a transparent and verifiable SMM price setting mechanism and provide market participants with an important pricing indicator.

2. Guidelines to SMM 304/2B Stainless Steel Coil spot price

2.1 Definition

The SMM 304/2B Stainless Steel Coil spot prices are assessed and reported based on the methodology defined in this document. The prices reflect offers from agents (sales agents designated by stainless steel mills) and traders in Wuxi stainless steel spot market at the time of publication on each complete trading day.

Prices assessed in this methodology refer to prices of cold-rolled stainless steel coil (304/2B) with rough surface finish, namely 304/2B.

2.2 Introduction of price assessment

SMM collects data information used to evaluate stainless steel (304/2B) spot prices by means of standard acquisition (that is, the collection of raw data information that complies with the SMM Data Standards Policy), from including the offers on the same day and the actually traded price of spot transaction provided by the price submitters that have signed agreements with SMM and price submitters that did not sign agreements with SMM but meet price collection standards. The amount of each transaction that can be deemed as the standard stainless steel spot offers or trades in the price collection will be not less than 20 mt. Data collection, assessment (calculation) and daily management of SMM stainless steel (304/2B) spot prices are conducted by SMM Operational teams (consists of 2 price analysts and a price manager).
