

Secondary Refined Lead Spot Price Methodology

Product: SMM Regenerated Fine Lead

Last official consultation time: May 1, 2018

Expiry date of this document: December 31, 2020

Last updated: June 1, 2018

table of Contents:

- 1. General Principles of SMM Price Methodology**
- 2. The formation of the spot price of SMM recycled refined lead**
 - 2.1. Definition**
 - 2.2. Introduction to formation**
 - 2.3 Detailed formation process and related regulations**
 - 2.3.1 Information data collection**
 - 2.3.2 Information data standardization**
 - 2.3.3 Verification and screening of information data analysis**
 - 2.3.4 Special circumstances**
 - 2.4. Sources of raw data information**
 - 2.4.1. Selection criteria for bidding units**
 - 2.4.2. Requirements for smelting enterprises**
 - 2.4.3. Requirements for downstream enterprises**
 - 2.5. Acquisition process**
 - 2.6. Trading products**
 - 2.6.1. Product specifications**
 - 2.6.2. Quantity**
 - 2.6.3. Valuation currency and unit**
 - 2.6.4. Price Terms**
 - 2.6.5. Payment method**
 - 2.7. Price release and historical data**
 - 2.7.1. Price release**
 - 2.7.2. Representation**
 - 2.7.3. Modify the published price**
 - 2.7.4. Historical price data**
 - 2.7.5. Acquisition of bids from other objects**
 - 2.8. Methodological changes**
- 3. Comply with the SMM policy**
 - 1. Guidelines to SMM price assessment methodology**

Shanghai Metals Market ("SMM") is an independent service provider that does not participate in trades. SMM is a market observer that engages buyers and sellers in the commodities market. By consulting with industry independent participants, SMM drafts the methodology, examines and revises it regularly based on the specifications and terms of trade that are generally used in the market, with equal weighting given to transactions that meet the standards. SMM reserves the right to exclude any unreliable or unrepresentative price data

from its price assessment, in line with this methodology and other related Benchmark governance policies and procedures. SMM believes the processes and procedures documented in their Methodologies represent the most accurate way of representing the underlying economic reality of the markets each Benchmark seeks to measure.

SMM price assessments refer to metals spot prices or price indices of both the Chinese and overseas markets reported by SMM on a daily basis. All SMM prices are published according to a set of defined methodologies, indicating how the prices are accessed and reported. These methodologies are published on our website www.metal.com (English) or www.smm.cn (Chinese) or for all market participants to understand and refer to.

To reflect the actual trades in the spot market, SMM will update the methodology for SMM price assessments and publish all the revisions on our website www.metal.com (English) or www.smm.cn (Chinese) 28 days ahead of the changes. For queries or suggestions on the methodology, please contact SMM customer services (please find contact information on the SMM official websites). **Please read this paragraph in conjunction with the SMM methodology review and changes policy, and the SMM Complaint Policy available at www.metal.com (English) or www.smm.cn (Chinese).**

This document specifies the standards and management methods for the SMM secondary refined lead spot price assessment. These standards are formulated to establish a transparent and verifiable SMM price setting mechanism and provide market participants with an important pricing indicator.

To ensure that SMM Benchmarks and indices are constructed, maintained and operated to the highest standards, the administrator of the SMM Benchmarks – Shanghai Metal Markets (“SMM” or “the Administrator”, herein known as “SMM”) employs a robust governance framework to manage and approve new Benchmarks and also approve changes to the methodologies of existing Benchmarks.

The SMM Benchmark Management Committee (“the Committee”) is responsible for all aspects of the design, management governance and calculation of the SMM Benchmarks, and is responsible for approving all policies and procedures relating to the provision of the Benchmarks. The Committee will regularly - and no less frequently than annually - review the methodology and its evaluation and publication process. Additionally, the Committee will review the methodology and all other relevant policy and procedure documents in response to changes to market conditions or any aspect of the dynamics of the underlying market the Benchmarks seek to measure.

The Committee maintains oversight of the SMM Benchmark methodology and its compilation process, ensuring that SMM prices and indices reflect as closely as possible the objective conditions of physical markets of relevant commodities. The Committee will immediately point out any problem it finds, and propose external consultations and modifications to the existing methodologies or processes, in order to improve the quality of prices or indices published by SMM. The Committee can only propose changes to the methodologies and processes used in future Benchmark assessments, rather than modifying the already published prices or indices.

2. Guidelines to SMM secondary refined lead spot price

2.1 Definition

The SMM secondary refined lead spot price is assessed and reported based on the methodology defined in this document. As a benchmark, it can be referred to by both parties of secondary refined lead spot transaction as their settlement price. The prices are the guidance prices of secondary refined lead (ex-works, including tax) in domestic spot markets on each working day, and are published before centralised trading.

2.2 Introduction of price assessment

SMM secondary refined lead price = actual traded price of secondary refined lead on the next day *20% + SMM #1 lead price on the same day *30% + expected offers by submitters on the same day *50%

SMM collects data information used to evaluate secondary refined lead spot price by means of standard acquisition (that is, the collection of raw data information that complies with the SMM Data Standards Policy), from including the bid and offer of the buyer and seller that were not traded on the same day, and the actually traded price of spot transaction provided by the price submitters. Data collection, assessment (calculation) and daily management of SMM secondary refined lead spot price are conducted by SMM Operational teams (consists of 2 price analysts and a price manager).

Please read this paragraph with the SMM Benchmark Guidelines on Hierarchy of Data Inputs [available](http://www.smm.cn) at www.smm.cn.
